NOTABLE THEATRICAL PRODUCTION AT JOPLIN

The New Joplin Theatre of Joplin announces the forthcoming engagements of the season's two most notable theatrical offerings; one the greatest of musical hits and the other a comedy that has broken the world's record of three years on Broadway. These attractions and their dates are George M. Cohan's "Mary" Monday and Tuesday, March 7 and 8; and John Golden's "Lightnin'," Sunday, Monday and Tuesday, March 13, 14 and 15.

Inasmuch as these attractions are playing to absolute capacity everywhere, it is distinctly advisable that out-of-town patrons secure their seats by mail at the earliest moment. Orders accompanied by self-addressed stamped envelope and remittance, payable to the New Joplin Theatre, will be filled at once in the order received.

The same scale of prices will prevail for both "Mary" and "Lightnin'"; viz: box seats \$3; lower floor and first four rows of balcony, \$2.50; next three rows balcony, \$2; balance of balcony \$1.50. Gallery (not reserved) 50c. Ten per cent should be added to these prices to cover war tax.

The boxoffice sale for "Mary" will open on Thursday, March 3 and for "Lightnin'," on Thursday March 10. No phone orders will be accepted or seats laid aside unless paid for. 05t3

The Eden

If it's cleanliness you want — it's an Eden you want

We say "an Eden" because it is the only washer with the Sediment Zone—that patented feature which separates all dirt from the clothes as soon as it is flushed out of them and keeps it from mixing with the things again. And so, if you want your things really clean, get the washer that washes clean—The Eden with the Sediment Zone.

Investigate the Sediment Zone in your home—FREE

You will have to have an electric clothes washer sooner or later—women know how much time, strength and money they save. When you do buy, get the washer that saves most and serves best. We will send an Eden to your own home and let you see how much cleaner the Eden washes your clothes than they have ever been washed before. You don't have to keep the machine—we stand all the expense of delivery and let you assume no obligation whatsoever. But if you are perceiving enough to see what it will save you, keep the Eden on the Easy-Payment Plan by which you pay as you save.

We invite you especially to visit our store and see the Famous "EDEN" at work on Monday, the 7th, Sales Day.

We will have with us that day a Special Factory Demonstrator who will be delighted to show the merits of the wonderful Eden Washer.

Keep The Egg Basket Full!

The feed elements that make whites of eggs are entirely different from those that make yolks. When hens aren't fed both the white and yolk making elements, they can't keep the egg basket full. The usual method of feeding mostly grain makes yolks but not enough whites to complete the eggs.

Missouri Experiment Station tests prove that 100 lbs. of wheat, corn, oats, barley and kaffir corn make (above bodily maintenance) an average of 224 yolks to 154 whites. Based on data from the same experiments, Purina formulas produce, (above bodily maintenance) as follows:

	Yolks	Whites
Purina Hen Chow	247.49	142.11
Purina Chicken Chowder	182.05	282.55
Combined Ration	429.54	424.66

These Purina chows not only make a practically equal number of whites and yolks but more of both than ordinary chows.

Note that Purina Chicken Chowder contains the necessary white-forming elements to balance up the yolk-making grain ration. That's why it makes hens lay so heavily. Instead of the yolks being absorbed by the hen's system, Purina Chicken Chowder makes the whites to complete the eggs and they are laid. Thus we can absolutely guarantee

more eggs or money back

on Purina Chicken Chowder if fed with Purina Hen Chow as directed. You take no risk.

Dairy Products Necessary for Physical and Mental Development

The National Dairy Council, with the aid of some of the world's leading nutrition experts, has worked out the following data with regard to the expenditures of the average American family for food:

	Now are (per cent)	Should be (per cent)
Meat and fish	35	12
Milk and its products	20	44
Bread and cereals	15	13
Vegetables and fruits	13	17
Eggs	6	6
Sugar	5	3
Miscellaneous	6	5

Maximum physical and mental development of the race demands the use of at least twice the dairy products per capita that are now being consumed.
